WORK EXPERIENCE

The Sherwin-Williams Company

Cleveland, OH

Web Developer

1/07 - Present

Redesigned corporate directory to better serve the international community. Created additional front-end designed specifically for BlackBerry and internationalized the site to include Spanish and Portuguese languages. Added AJAX functionality to improve the usability and performance for the over 1 million searches run annually.

Mentored and assisted an intern in creating System Operational Support application. Created application architecture and custom Object Relation Mapping (ORM) implementation based on CGLib to abstract legacy data access library. Application is currently used by over 80 Sherwin-Williams systems.

Aggregated employee records from Oracle Identity Manager, Corporate LDAP, Lotus Notes databases, mainframe systems, and other data repositories to identify and cleanse 2,000 consultant and international employee records not present in Oracle Human Resources Management System (HRMS). Project was critical part of top Corporate IT initiative aiming at making HRMS the single point of entry for all employees and contractors into Sherwin-Williams' systems.

Current work is focused on implementing Oracle Identity Manager in order to provision access to Oracle Financials, other Oracle applications, and custom web applications. Created service oriented architecture (SOA) to handle application authorization and provide employee information across corporate web portfolio.

The Vanguard Group

Valley Forge, PA

Information Systems Engineer - Technology Leadership Program

7/06 - 1/07

Provided bug fixes and usability enhancements to the Vanguard Information Security Architecture (VISA).

Created the ability to submit XML batch loads to migrate users into Computer Associates' eTrust Identity and Access Management product. Setup full weekly and incremental daily backups of application and user data.

OUTSIDE EXPERIENCE

TabWorldOnline.com

06/00 - 07/05

Created and ran Tab World Online, a profitable guitar website, which was sold in July 2005. Extensively marketed the site which received over 1 million page views per month and held over 4,500 registered users. Forged business partnerships, improved visitor return rate, and increased site attention span.
